Luis Toledo

Software Engineer

Focusing on optimizing system efficiency, refining algorithms, and enhancing software quality to deliver high-performance solutions.

EXPERIENCE

Tata Consultancy Services, Querétaro, MX (On-site) — *IT Trainee*

June 2024 - Present

River Project, St Petersburg, Florida (Remote)— *Software Engineer*

July 2022 - July 2023

Developed and maintained a Discord bot for user integration, information gathering, and study group creation.

Conducted system migrations and provided ongoing web page maintenance.

Morena, Sonora, Mexico — DB Manager

February 2021 - July 2021

Managed the database for all poll workers in the 7th district of the state of Sonora, ensuring accurate and efficient record-keeping.

EDUCATION

Instituto Tecnológico de Sonora, Obregón, Sonora, México— *Software Engineering*

2021 - 2024

Focused on mastering Software Design and Architecture for the development of large-scale systems.

Grade: 9.7/10

PROJECTS

River Project

— *Discord Bot*

Created a Discord bot using Docker, TypeORM, and TypeScript to integrate users, gather information, and facilitate study group creation.

Enhanced bot functionality by connecting it to a cloud-based database for seamless user interaction.
